

XT5 /XT5H Converter for Flomid/Flomat Electromagnetic sensors Series XT5 / XT5H

- DC coil excitation obtains a negligible zero drift.
- Pulse output.
- Analog output 4-20 mA (active or passive).
- Easily user configurable without having to open the enclosure (touch keys).
- Different working units, independent for flow rate and totalizer.
- Easy replaceable between Flomid and Flomat FX sensors.
- Compact or separate mounting.
- Orientable display (two positions) to adapt to the installation position.
- Local indication of flow rate and totalizer. Totalizer reset.
- Configurable flow rate direction.
- Empty pipe indication.
- HART protocol compatibility (model XT5H).
- U.V. resistant polycarbonate enclosure. Ingress protection IP67.
